

# URGENT!!! Why FEMA is Desperate to Get You Inside Their Massive Detention Centers!

HIDDEN AGENDA September 23, 2023

**Powerful organizations and institutions are actively attempting to censor Gazetteller. We strongly encourage you to share this news with the world.**

**Knock... Knock...**

**There's a chilling air as the wooden door reverberates with the ominous tapping. The sensation of your heart dropping into your stomach is unavoidable. It's not the neighbor asking for a cup of sugar or the postman delivering your mail. The voice you hear is firm and unwavering.**

***"Sir, I'm an agent with the Federal Emergency Management Agency. For your safety, we're here to relocate you and your family."***

**In the land of the free and the home of the brave, it appears there's a more sinister game afoot. If you thought your rights as an American citizen were unshakable, think again.**

While we slept, wrapped in the flag and singing the anthem, an almost spectral presence took shape. Established in 1979 under the careful guidance of President Carter, the Federal Emergency Management Agency (FEMA) emerged. It promised to be the guardian of the public during crises, ensuring federal government continuity.

## Essential Guide: **How to Truly Prepare Before FEMA Comes Knocking on Your Door!**

There are ten regions, each bound to its own emergency response based on threat levels and population densities. Sounds simple and helpful, right? Think again.

Peel back the layers, and what do you find? An unsettling reality where most of FEMA's funds and a significant portion of its workforce are lost in the bureaucratic abyss of the Federal Government's black budget program. Only a select few in Congress were privy to the ins and outs of this operation. A treasure trove of financial and human resources, with no accountability! Where did it all go?

If we refer to the bold revelations of Miami Herald journalist Alfonso Chardy, he unveiled the haunting "Rex 84". This was no ordinary government initiative, but a drill where countless American citizens, suddenly tagged as "**national security threats**", were earmarked for detention during a state of emergency. The directive also entrusted the military to control civilian movements.

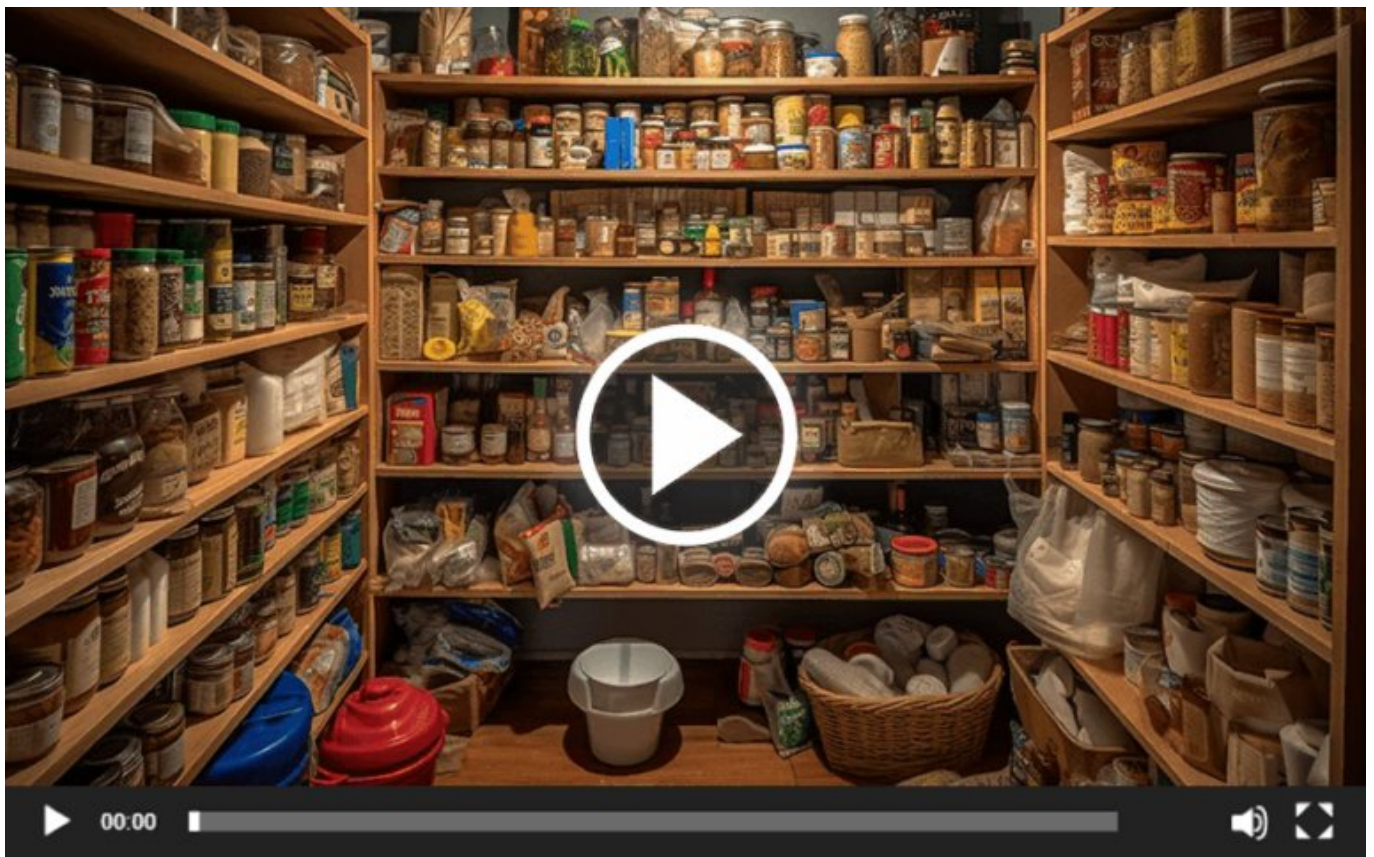

## The Quiet Threat: 800 Camps Beckoning Their Residents

The question you must be asking – Where would they move these citizens?

The unnerving answer lies in the 800 dormant facilities spread across America. With one such facility near Fairbanks, Alaska, designed to hold up to 2 million individuals. Now, run the numbers. Alaska's population doesn't even touch 800,000. Who, then, is this facility for?

The very essence of these camps screams a story. Silent, vacant, but always ready, as if predicting an impending cataclysm. An event that requires you and millions of others.

### Critical Update: **Stockpiling – The Ultimate Key to Staying Invisible in FEMA's Master Plan!**

With the turn of the century, FEMA got a new overseer: the Department of Homeland Security. And as history reveals, the perspective of the Federal Government evolved, painting citizens with a broad, suspicious brush. Responsible gun owners, often the backbone of a free society, are now dubbed as “**domestic terrorists**“. The audacity!

Yet, this isn't a mere whim. A staggering \$16 million was funneled into a program by the University of Maryland. Its objective? To monitor and tag potential “domestic terrorist” threats.

Remember the past, America. Recall the times between 1942 and 1946 when over 125,000 Japanese-Americans were imprisoned in internment camps. Colonel Karl Bendetsen's shocking directive was clear: anyone with even **“one drop of Japanese blood”** should be detained indefinitely.

## “The FEMA Enigma: Hope or Dread?”

Hope in FEMA's promises? Or dread the whispered secrets of their shadow? These are questions every American must now grapple with. We've unraveled how FEMA's **“Crisis Relocation Plan”** could feasibly **“evacuate”** a staggering 65 percent of the US population within a mere three days. But where are these people going? What lies in store?

Let's connect the dots.

The placement of these expansive facilities, particularly ones like Alaska, in remote, less accessible regions speaks volumes. It paints the picture of a massive orchestration to detain and transport citizens to their ultimate locations.

## Important! – **Why FEMA's Reliance on a Biblical Error Could Spell Doom for Thousands!**

Such a monumental operation would undeniably demand a sophisticated tracking system. And you might argue, *“I live in a bustling city! They can't possibly get to me.”* Or perhaps, *“I've gone off-the-grid. They can't track or find me!”* But think again. Distance or obscurity won't deter them.

Many of these chillingly silent camps are strategically placed on federal land, away from prying civilian eyes and inquisitive media lenses. Proximity to a railroad system or potential for a makeshift runway is a common feature. Take, for instance, the camps in Millard County, Utah, and Lewisburg, West Virginia. These facilities weren't originally built for modern citizens but for German POWs and Japanese-Americans during World War II.

Even notorious offshore American military bases and black sites, such as Guantanamo Bay, could very well transform into FEMA detention centers. Their camouflage is impeccable. Some are concealed, while others masquerade as harmless civilian structures. In a chilling encounter, a father and son unsuspectingly stumbled upon the Skull Valley site in Utah, carved within an abandoned U.S. Government bombing range.

FEMA's silence is deafening. Their vast camp program remains covert. An occasional leak might emerge, but it's hastily silenced. And just because mainstream media remains oblivious, or perhaps intentionally mute, doesn't invalidate their existence.

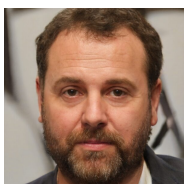

It's undeniable. They're there.

But let's pivot from this looming darkness and ask, **"How can we shield ourselves and our loved ones?"**

The initial moments post-crisis are critical. Avoiding FEMA's knock isn't a solution. If they want in, they will get in. What's needed is a sanctuary—discreet and impenetrable.

**Because, dear readers, freedom isn't just our right; it's our duty to protect it.**
